

Decal set for Tu-134 model in 1/144 scale. Designed for Zvezda kit #7007

This decals set allows you to paint the model in one of the three variants.

NOTE: You need to correct illuminators location before build in accordance to the enclosed instructions. See below.

ILLUMINATORS CORRECTION SCHEME

Front right side view

Back left side view

For accurate right side illuminators location use self-adhesive template from this set.

Template scheme

1. Combine first normal illuminator from the nose with illuminator (A) on the template and small illuminator in the door with illuminator (D) on the template.
2. Drill a hole diameter 2.8 mm at the position hole (B) on the template. Use part C6-1 for this hole. See scheme below.
3. Drill a hole diameter 2.1 mm at the position hole (C) on the template. Use part C5-1 for this hole. See scheme below.

Transparent parts usage scheme
